

## NORTH AYRSHIRE WATERMILL SURVEY

**Name of mill:** North and South Millburn and Millburnbank

**Date visited:** Sites not visited on this occasion but from previous local knowledge I have not been able to locate the derivation of Millburn or any mill associated with it. There is a Millburn but where was the mill?

**Address:** All by Eglinton Country Park, Irvine.

**Grid ref:** NS334427 This grid reference is for North Millburn. South Millburn is located nearby with the area of Millburnbank being found in the Eglinton Country Park

**Notes:** No mills are shown on the 1<sup>st</sup> edition OS. According to a member of the Country Park staff there was a mill on the River Lugton near what was Fergushill house and South Fergushill farm. This however does not seem to explain the origin of the Millburn references.

As it is likely all the properties/areas mentioned used to be part of the Eglinton estates an investigation of the estate plans/records is necessary.
