--------	---------------------	---

1. INTRODUCTION

1.1 General

- 1.1.1 This report presents the results of a watching brief and limited excavation carried out during ground-breaking works, in preparation for the building of a maintenace compound and its associated access road, at Castle Stuart Golf Course, Inverness (NGR: NH 7414 5015, Fig 1) during May 2007.
- 1.1.2 The work was carried out in response to meet the planning recommendation on application 05/00316/FULIN. The work was commissioned by Castle Stuart Golf LLP. This phase of work followed a programme of archaeological evaluation carried out by CFA Archaeology Ltd in June 2006 (Johnson 2006) and September 2006 (O'Connell 2006).

1.2 Objectives

1.2.1 The objectives of the watching brief were to identify and record any archaeological remains uncovered during the groundbreaking work, in order to formulate a mitigation response if necessary.

2. WORKING METHODS

2.1 General

2.1.1 CFA Archaeology Ltd follows the Institute of Field Archaeologists Code of Conduct, Standards and Guidance for Archaeological Watching Briefs. Recording of all elements followed established CFA methods, principally by drawing, photography and completion of standard recording forms.

2.2 Watching Brief

- 2.2.1 The watching brief focussed on an area to the north of Castle Stuart that had been used as a grass nursery prior to its reduction for use as a site compound. This phase of the work ran from the 4/5/07-16/5/07.
- 2.2.2 Excavation was carried out by a team of four between 14/5/07 and the 18/5/07, where hand cleaning was carried out and features were excavated in Area 1.

3. ARCHAEOLOGICAL RESULTS

3.1 General

- 3.2 For the purposes of recording, the site was subdivided into four areas. In area 1 circa 80 features were identified during the watching brief and another 60 features were discovered during hand cleaning of area 1. If this principle is applied to the other areas then the number of estimated features would be:
 - Area 2, 30 features seen 50 predicted.
 - Area 3, 50 features seen 90 predicted
 - Area 4, 7 features seen 10 predicted.
- 3.3 The features were sealed by a 1m-1.8m depth of overburden and topsoil, and all were cut into the subsoil which varied from a sandy silt in the southern half to a stony-gravelly sandy silt in the northern half. The two halves of the site were divided by a hollow which had a fine white-grey sand heavily stained with manganese, within which may be archaeological features.
- 3.4 The following text presents the results of the watching brief and the excavations in Area 1. Context numbers are given in bold and parentheses; full descriptions can be found in Appendix 1.

Area 1

3.5 A total of 140 features were discovered after cleaning, of which 17 were excavated (Fig. 1) (**41, 46, 47,48, 49, 50, 51, 52, 58, 59, 66, 72, 75, 82, 83, 84** and **85**). The features in this area were isolated round or oval pits or groups of double pits, with **F85** containing Bronze Age pottery sherds and fragments of burnt bone. No evidence for structures was seen during the excavation, but it is plausible that future work will reveal spatial patterning indicating structures. The features were truncated and varied in size from 0.32m x 0.25m x 0.2m deep to 0.8m x 0.79m x 0.2m.

Area 2

- 3.6 Features in Area 2 included:
 - A putative roundhouse, circa 6-8 diameter defined by an arc of pits, within which was a possible occupation layer containing burnt wood and ash.
 - A 6m by 1.5m linear gully was recorded with associated post-holes flanking its edges.
 - A 5m wide hollow running east-west across Area 2 contained a high degree of manganese staining; however, there is the possibility that this staining was masking further archaeological features as small test excavations revealed charcoal within the this feature.
 - A scatter of isolated pits similar in form to those found in Area 1.

Area 3

- 3.7 Area 3 contained a suite of pits and linear features. This area had a sandier subsoil than Area 1 and 2 and was more prone to wind blown sand masking many of the features. During the watching brief the following features were recorded;
 - An arc pits possibly outlining a roundhouse (circa 8-10m diameter).
 - Four pits of circa 2m diameter, at least one of which contained a high percentage of marine mollusc shells, and one pit of circa 4m diameter; an array of smaller pits averaging 0.5m diameter, two of which were linked by a curvilinear gully circa 3m x 0.5m.
 - Two kidney bean shaped features circa 2.5m x 1m.
 - A number of isolated pits.

Area 4

- 3.8 Seven features were recorded in this area including;
 - 6 pits varying in size from 0.6m diameter to 1m x 0.7m, two of which contained marine mollusc shells and one containing fire cracked stone.
 - A linear gully running east-west, at the southern end of the area contained unworked stone debris, possibly a relict field boundary.

4. DISCUSSION & CONCLUSIONS

- 4.1 The watching brief and limited excavation enabled an approximate quantification and preliminary description of the archaeological remains to be made. The features uncovered are of probable prehistoric date. Preliminary analysis indicates that there are two roundhouses, five linear features, and a great number of pits varying in size and distributed across the site. It seems probable that further analysis and excavation will enhance the range and number of these features considerably.
- 4.2 The project archive, comprising all CFA record sheets, maps and reports will be deposited with the National Monuments Record of Scotland (NMRS).
- 4.3 It is suggested that a summary statement, to be submitted for publication in *Discovery and Excavation in Scotland 2007*, represents a sufficient level of reporting for this project.

APPENDIX 1

Gazetteer of Excavated Features

Feature Number	Shape in plan	Sides	Base	Dimensions (in Metres)	Fill/Comment
41	Circular	Steeply sloping	Slightly concave	0.32 diam x 0.07	A mid orange brown sand with 4% small sub-angular stone and fibrous root inclusions.
46	Circular	Gently sloping	Concave		A dark brown/black silty sand with 10% medium sub-angular stone, fibrous root and charcoal inclusions. Contained pre-historic pottery and a possible hammer stone
47	Circular	Steeply sloping	Flat	0.73m diam x 018	A dark brown/black charcoal rich sandy silt with small fibrous root inclusions. Contained flecks of burnt bone
48	Circular	Steeply sloping	Flat	0.6 diam x 0.14	A dark brown charcoal rich silty sand with infrequent small sub-rounded stone and root inclusions. This feature was cut by F49
49	Circular	Gently sloping	Concave	0.58 diam x 0.09	A medium to dark brown silty sand with 5% small sub-rounded stone, fibrous root and infrequent charcoal fleck inclusions. This feature cut F48
50	Oval	Shallow sloping	Flat	0.5 x 0.4 x 0.05	A black organic charcoal rich sandy silt
51	Oval	Shallow sloping	Flat	0.5 x 0.4 x 0.05	A black organic charcoal rich sandy silt
52	Circular	Gently sloping	Concave	0.36 diam x 0.07	Two contexts, (52/002) a post-pipe comprisiong of a black charcoal rich silty sand with dark brown mottling and (52/003) a primary fill of a mid brown silty sand with 5% small sub-angular stone inclusions
58	Sub-circular	Shallow sloping	Flat	0.62 x 0.6 x 0.07	A mid brown sandy silt with occasional charcoal flecks
59	Sub-circular	Gently sloping	Flat	0.8 x 0.79 x 0.2	A mid brown sandy silt with occasional charcoal flecks and pebble inclusions
66	Sub-circular	Gently sloping	Concave	0.5 x 0.4 x 0.1	A light brown sandy silt with occasional charcoal flecks and stone inclusions
72	Oval	Shallow sloping	Concave	0.78 x 0.68 x 0.08	A mid brown silty sand with very occasional charcoal flecks and <4% small sub-angular stone inclusions
75	Triangular	Steeply sloping	Conical	0.3 x 0.25 x 0.2	A dark brown sand with occasional charcoal flecks
82	Sub-circular	Sloping	Concave	0.9 x 0.8 x 0.2	A mid brown silt with occasional charcoal flecks
83	Oval	Shallow sloping	Concave	0.9 x 0.8 x 0.1	A mid brown silty sand with very occasional charcoal flecks and <2% small sub-rounded pebble inclusions
84	Circular	Steeply sloping	Flat	0.5 x 0.46 x 0.18	A mid brown silty sand with very occasional charcoal flecks
85	Circular	Sloping	Concave	0.5 x 0.15	A dark brown charcoal rich silty sand. Contained burnt bone and pottery spot dated to the 2 nd half of the 2 nd millennium BC. Possible cremation burial.

APPENDIX 4 DES Entry

	· · · · · · ·
LOCAL AUTHORITY:	HIghland
PROJECT TITLE/SITE NAME:	Castle Stuart Golf Course, Invrness
PROJECT CODE:	CAST
PARISH:	Petty
NAME OF CONTRIBUTOR:	Alisdair Curtis, Chris O'Connell
NAME OF ORGANISATION:	CFA Archaeology Ltd
TYPE(S) OF PROJECT:	Archaeological Watching Brief
NMRS NO(S):	
SITE/MONUMENT TYPE(S):	
SIGNIFICANT FINDS:	None
NGR (2 letters, 6 figures)	NH 741 501
START DATE (this season)	May 2007
END DATE (this season)	May 2007
PREVIOUS WORK (incl. DES ref.)	
MAIN (NARRATIVE) DESCRIPTION: (May include information from other fields)	A watching brief and limited excavation was carried out during ground reduction work associated with the construction of a compound and access road at Castle Stuart Golf Course, Inverness. Preliminary results indicate that the site contains 2 roundhouses, five linear features and a great number of pits of various sizes distributed across the site.
PROPOSED FUTURE WORK:	N/A
CAPTION(S) FOR ILLUSTRS:	N/A
SPONSOR OR FUNDING BODY:	Castle Stuart LLP
ADDRESS OF MAIN CONTRIBUTOR:	The Old Engine House, Eskmills Park, Musselburgh, EH21 7PQ
EMAIL ADDRESS:	cfa@cfa-archaeology.co.uk
ARCHIVE LOCATION (intended/deposited)	National Monuments Record of Scotland
	City of Edinburgh Council Archaeology Service Sites and Monuments Record
